How the World Will Look After it teat! is Changed

RIGHT VIEW OF THE FUTURE.

We Will Have a New Earth Wherein Will Dwell Righteousness.

By a novel mode Dr. Talmage in this discourse shows how the world will look after it has been revolutionized for good: text, II Peter iii, 13. "A new earth, wherein dwelleth righteousness.

Down in the struggle to make the world better and happier we sometimes get depressed with the obstacles to be overcome and the work to be accomplished. Will it not be a tonic and an inspiration to look at the world as it will be when it has been brought back to paradisaical condition? So let us for a few moments transport ourselves into the future and put ourselves forward in the centuries and see the world in its rescued and perfected state, as permitted to revisit this planet, as I am sure we will. We all want to see the world after it has been thoroughly gospelized and all wrongs have been righted' We will want to come back, and we will come back to look upon the refulgent consummation toward which we have been on larger or smaller scale toiling. Having heard the opening of the orchestra on whose strings some discords traveled, we will want to hear the last triumphant bar of the perfected oratoria. Having seen the picture as the painter drew its first outlines upon canvas, we will want to see it when it is as complete as Reuben's "Descent From the Cross" or Michael Angelo's "Last Judgment." Having seen the world under the gleam of the star of Bethlehem, we will want to see it when, under, the full shining of the sun of righteousness, the towers shall strike 12 at noon.

There will be nothing in that coming century of the world's perfection to hinder our terrestrial visit. Our power take us long to come here, however far and scatter.' off in God's universe beaven may be. The Bill declares that such visitation tion? Surely the gates of heaven will from descending for a tour of inspection and congratulation and triumph.

Souls went up from all the denominations in America in holy rivalry, seeking which could soonest cast down the crown of this continent at the Saviour's feet, and America saved.

But often you and I, who were companions in that expedition from heaven to earth, seated on the green bank o the river that rolls through the paradise of God, will talk over the scenewe witnessed in that parenthesis of heavenly bliss, in that vacation from the skies, in our terrestial visitationwe who were early residents in the nineteenth century, escorted by the spirit of the twenty-first centuay, when we saw that my text describes as "a new earth, wherein dwelleth righteous-"Glory be to the Father and to the Son and to the Holy Ghost, as it was in the beginning, it now and ever shall be, world without end.

CHANCE EOR THE CHILDREN.

To Aid in Raising the Jefferson Davis Monument.

The following letter from a teacher occosions the appeal herewith made to those in whose power it lies to make contribution clubs for small amounts for the children and others to aid the Confederate women in erecting the Davis monument: L-, Nov. 25, 1899

Dear Mrs. Taylor, President S. C. Division, D. C.

If you think it advisable will you bring to the notice of the Daughters of the Confederacy a matter which interests me? A pupil in our school who had two years before studied United States history under me suggested that she would like to contribute a little to the monument to be erected by the southern people to Mr. Davis, even if she only gave a nickel. A boy in the class ridiculed the idea of a nickel being worth giving. I said to them, that if every boy and girl throughout the State gave even 1 cent it would make a magnificent contribution, That startevery student who was studying or had studied about the Confederacy to give something for the Davis modument. I decorated the mite box with the Confederate bolors-red and white-and a miniature battle flag, and also a likeness of Jefferson Davis. Almost every child gave something. Some of the little ones at home heard their older brothers and sisters speak of it, and sent their mites. Indeed the first coin dropped in the box was given by a boy 4 years old whose grandfather had been killed at Charleston.

The children want me to suggest to you that our example of a small contributism be followed by s chools throughout the State. Truly yours etc.

DOUTHIT ON TOP.

From Blame.

HIS POSITION WAS RESTORED

Mr. Robinson, of the Committee Which Brought Charges Against Him, Offered the Resolution.

The State board of control has reversed its former action in discharging Mr. J. B. Douthit, commissioner, and that official was reinstated Friday when it met at 11 a. m., and took up the consideration of the case of Commissioner Douthit, all members of the board being present.

The pending question before the board was the consideration of the resolution offered by Mr. Haselden Thursday evening, to the effect that, nasmuch as Judge Aldrich had decided that the removal of Commissioner Douthit was illetal, the charges against that official be withdrawn and that the entire matter be referred to the general assembly at its appraching session.

Mr. Robinson stated that he was unwilling to support the resolution, inasmuch as he thought the board was competent to handle the matter, and that he felt indisposed to shirk any responsibility, and that he thereafter offered the following as a substitute for Mr. Haselden's resolution:

"Whereas, certain charges have heretofore been made against J. B. Douthit, commissioner; and whereas the board panied by a lady, descended and of control has since become thoroughly walked briskly towards the line street commissioner; and whereas the board convinced that the charges cannot be sustained: be it, therefore,

"Resolved, That the said charges be. and they are hereby, withdrawn. In support of his resolution, Rollinson stated that, acting with Mr. Haselden as a committee of investigation, he had joined in a report to the board of control making a number of charges against Mr. Douthit. This re port was based upon ex parte testimony, submitted along with the report | and placed the man under arrest. The to the board, and that he had voted to stranger faced his captors with a look ing the charges preferred to be true. ce that time, however, he had in-

sigated for himself, and found that me charges could not be sustained, and that he then considered it his duty to himself, to Mr. Douthit and to the publie to say so by proposing this resolu-

requisition. At the evening session of the board. on motion of Mr. Robinson, in view of the action of the board yesterday in the case of Commissioner Douthit, all resolutions adopted and action taken in the case at the November meeting of the board were rescieded, so that Mr. Douthit is nowfully restored to his duties as commissioner, in fact as well

IS HE THE ROBBER?

A Young White Man Arrested on Suspicion.

The News and Courier of last Wednesday says:

As the evening train from Columbia and Augusta rolled into the Southern Railway depot last night, a few minutes after 9 o'clock, a well-dressed man, carrying a cloth covered valise and accomentrance. The man was about medium height, wore a checked suit of light materials, soft, white hat and tan shoes. and his companion was quietly dressed in a dark-colored gown and a travelling

hat. Except to a few the movements of this pair were not noted, but as they neared the street Detectives James Miller and James Hogan stepped quietly from the shadow and, approaching the pair from either side, stopped them remove Mr. Douthit from office, believ- of astonishment, feigned or genuine, and asked what was the cause of his detention, but he was told that all this would be explained later. He was then taken to Central Police Station. His companion followed him to the Station, although told that she was under no obligation to go there.

At the police station the man gave the name of Bartow Warren. He exwas either guilty or innocent of the pressed the most profound ignorance of charges preferred against him, and in- anything which could have caused his sisted that the charges be either proven arrest. He was searched and upon his to be true or that the board should con- person was found a .38 calibre revolver fess that he is innocent. Warren is only allowed to see his coun-A petition for the establishment of a sel in private, all other interviews must take place in the presence of the sheriff or one of his deputies.

MAKING PEARLS TO ORDER

Mussel and Oyster Being Domesticated and Taught the Jewelry Business.

Diamonds, rubies, emeralds and sapphires have all been produced in the laboratory and it is now the turn of the pearl. The chemist, however, is not himself the maker of the new artificial pearls; he is only the collaborator. It is true that false pearl are made from mother-of-pearl, but their lustre is not up to the mark. The Chinese have long introduced grains of sand and little knots of wire into the shell of the pearl oyster in order that the animal, to relieve itself from the irritation so caused, may coat the foreign substance with pearl. If this matter be inserted between the shell and the mantle the oyster can eject it by con-tractions of his body. To prevent this M. Boutan, a French experimenter, has trepanned the shell and introduced a small bead of nacre, which might, how ever, be a true pearl of a small size, through the hole, and fixed it by means of cement to the shell. This bean was in course of time covered with nacre by the oyster, and a fine large pearl was the result. Dealers cannot distinguish it from an Oriental pearl. The question of making peacls in this way was recently discussed at a meeting of the Acedamies des Sciences. Paris, and M. Berthelot, the famous chemist, observed that such a pearl could only be considered a true pearl if it had at least a hundred layers of the pearl nacre; otherwise it would only be a foreign substance covered with nacre. Of course, if the foreign matter is a pearl itself this objection disappears, and we have the means of producing pearls at will. According to M. Lacaze Duthier, some two years would be required for a haliotide to produce a big pearl. The artificial pearl of the trade, fabricated from nacre, could also be coated in the same way. Evidently the pearl mussel and oyster are about to be domesticated for the production of pearls, as the spider for silk. Pearl divers may become a legend of the past.

The First Post Office.

The fact that there is a regular mail route through Alaska, and that even remote towns in Africa are not without postal facilities, is in these progressive times accepted quite as a matter of course. Yet this wonderful system, which has reached out until it includes every country on the face of the earth, had its beginning in the mind of an ingenious Frenchman who lived less than two hundred and fifty years ago. In 1658, early in the reign of Louis XIV.' M. de Velayer established a private penny post, says the writer in Harper's Round Table. Boxes were set up at the street corners for the reception of letters. Offices were opened in various quarters of Paris; collections were made once a day from the street boxes, followed many hours later by a single delivery, and thus the first Post Office in the world was established. M. de Valayer was so greatly encouraged by the success of his enterprise he printed certain forms of billets of notes which were intended to cover all the ordinary requirements of business in great towns. These forms contained blanks which were intended to be filled up by the pen with such special matter as might be necessary to com-plete the writer's object. The idea at once became popular, and the printed forms accompanied the expansion of the postal service throughout the larger cities of France, and it was

Snakes Do Swallow Their Young.

many years before they fell into dis-

I met with a curious incident some years ago while hunting snakes in the swamps at Melrose. I came across a male and female striped, with numertake him up to Orangeburg and deliver ous young ones. The parents were near each other, the family crawling over and around them. I was going for them, when, on second thought, I concluded to watch them. They did not appear to be frightened, but went on gamboling about for some time. I went a little nearer when both snakes turned toward me, making a faint noise, and placed their heads flat on the ground. It was a curious sight to see these snakes, not long born, some of them a foot or two away, turn at the noise, and instantly seek refuge in their parents' wide-open mouths. I am certain it was a note of warning of danger. I caught both snakes and put them in separate bags. The female had ten young and the male had swallowed five. This is the first instance of any notice of a male snake performing this affectionate duty for its young. I placed the whole family in a box, where they lived peaceably a long time. -From Forest and Stream.

> The Typewriter's Spread. There are probably few even among those who use the typewriter who have any proper conception of the variety and universality of the ingenious sub-

> stitute for the pen. Although only in its very early youth, it has already penetrated into every corner of the earth. It has gone with invading armies and explorers into the very heart of Africa. Lieutenant Peary has introduced it to polar ice and it has travelled thousands of miles over Siberian snows. It travels with every army and fleet, and it was one of the first things rescued from the sunken Maine.

Two of the most costly typewriters belong to the Queen and the Czar of Russia. They are exquisite machines of white enamel and gold, with keys of ivery. The Queen Regent of Spain uses one for her correspondence, the Khedive possesses one, and, in fact, there is scarcely a court in Europe where the typewriter has not a place.
